SUBJECT: Kurfees Coatings - A. L. Taylor Site

On December 3, 1980, I contacted Mr. Carroll Lang to update the status of the forty-two (42) drums removed by Kurfees Coatings from the Valley of the Drums (see memorandum dated August 29, 1980).

NOTE: I was previously informed by Mr. Lang that all resins would be incorporated into Kurfees' manufacturing process, and the remaining materials and containers would be dealt with according to all relative regulations (see memorandum dated September 22, 1980).

Mr. Lang informed me due to a "boom" in business, in the past months, no analyses on the proposed recyclable resins has yet been done. Resin analysis is required in order to determine the grade quality of the material prior to its incorporation into the manufacturing process.

Mr. Lang again stated that all materials have been isolated on site and properly labeled as to their hazard potential. Additionally, he reiterated his statement of September 22, 1980, regarding compliance with all pertinent regulations for the waste materials and their containers.
